WORK EXPERIENCE

Nido Biz Ho Chi Minh City
Data Analyst 08/2024 – Present

Internal Responsibilities

- **Managed the company's data projects:** planned, assigned tasks, tracked progress, and organized business processes for client implementations.
- Managed operational data for the company's non-data projects: tracked **execution progress**, reviewed project status, and identified **bottlenecks** to reallocate resources promptly.
- Built data products for the company: automated sales data integration via **Sapo and Nhanh.vn APIs** into the accounting service workflow; developed an **MCP Server** for Easybook accounting software, enabling accountants to query and operate on accounting data directly through an **AI Agent**.
- Trained internal data staff and designed a learning path to bring interns up to **Junior Data Analyst** level, meeting market hiring standards.

BI System for a Trading Company ***Project Manager & Data Lead***

- **Context:** Financial, sales, and inventory data lived only in the accounting software; management reports were compiled manually in Excel, leaving the Board without timely visibility into profit, cash flow, and inventory.
- **Actions:**
  - **Data warehouse:** Set up and integrated data into a **BigQuery** warehouse; built an **automated 4-layer ETL pipeline** (orchestrated with **Google Apps Script**) and a **semantic model**, keeping data and metrics consistent across the system. Standardized and stored historical data changes via **CDC**. Implemented **role-based data access** and role-specific metrics.
  - **Data quality:** Integrated and cross-checked figures across sources; monitored data continuity, duplicates, and exceptions against operational business rules.
  - **Sales reporting:** Built **Power BI** reports on revenue and volume by channel, region, customer, product group, and SKU; separated **revenue views for Sales** from **gross profit and SKU-level margin views for the Board**. Analyzed **customer lifecycle**, **cohort retention**, and **RFM segmentation**. Worked with Sales to track **sales program progress** and measure **new SKU performance**.
  - **Financial reporting:** Consolidated the three financial statements (P&L, Balance Sheet, Cash Flow) and calculated key financial ratios.
  - **Inventory reporting:** Calculated inventory turnover; monitored and identified slow-moving stock.
  - **Import–export analysis:** Analyzed import–export data to assess **niche markets** and **competitors' market share**.
- **Results:**
  - Reporting system **refreshed automatically every day**, replacing the manual Excel process; each role sees only its own data and metrics.
  - After one year of partnership, the client's **revenue grew 17%**.
  - Identified **10% of inventory value as slow-moving stock** requiring action, informing the Board's decisions.

HR Dashboard for a Multi-BU Group

- **Context:** The group spans multiple BUs with separate departments and cross-company transfers; leadership lacked a clear view to **compare and evaluate HR performance across BUs** and group-wide.
- **Actions:** Built an HR management dashboard suite in **Power BI** covering headcount metrics, **personnel costs**, **training effectiveness**, and KPI completion cascaded from company to department and individual level.
- **Results:** Delivered a system enabling leadership to track HR and multi-level KPIs from a single source of truth.

ERP Rosy Ho Chi Minh City
ERP Implementation Intern / Associate 06/2023 – 01/2024

- Wrote **SQL** queries to build data retrieval features for the **ERP Rosy** system, supporting implementations for enterprise clients.

SKILLS

- **Skills:** Data Visualization, Data Warehouse Design & Operations.
- **Tools:** Python, SQL, BigQuery, Power BI, Google Apps Script.
- **Certifications:** Microsoft Certified: Power BI Data Analyst Associate (PL-300) – score **906/1000** (2024); HackerRank SQL (Advanced) (2024).

EDUCATION

University of Information Technology – VNU-HCM Ho Chi Minh City
Information Systems 2019 – 2023
